TERMS OF REFERENCE FOR THE TECHNICAL FEASIBILITY FOR THE ESTABLISHMENT OF TOEKOMSRUS INDUSTRIAL PARK

1. INTRODUCTION

The Presidency through the National Planning Commission (NPC) developed a National Development Plan (NDP) in November 2011 that aims to address the three central challenges of poverty, inequality and high unemployment that South Africans face. The NDP highlights a number of ambitious aspirations, which amongst them is to develop small to medium enterprises (SME) sector.

The NDP also intends to achieve a 90% employment creation through the SME sector by the year 2030; and to grow the South African economy by at least an average of 5.4% over a 15 year period starting from 2011. The NDP therefore identifies SMEs as fundamental and potentially instrumental in addressing the income inequality, poverty and unemployment in the South African economy.

This requires an SME sector that is encouraging and able to nurture feasible and viable business ideas. Despite the state's efforts and commitment to supporting the development of the SME sector, a number of challenges and constraints continue to hamper the growth, sustainability and expansion of this sector.

The most prevalent of these challenges include, amongst others, a lack of capacity to undertake market research resulting in a lack of understanding of market needs and characteristics, lack of appropriate skills particularly technical and business management skills, difficulty in accessing required resources such as financial resources and land, difficulty in attaining market share for products and services etc.

In order for the state to strive towards achieving the 90% job creation target, imposed onto the SME sector by the NDP, there is an urgent need to create a business environment that supports the growth and sustainability of existing SMEs, instils a culture of entrepreneurship, and enables the new SMEs to succeed.

It is acknowledged that numerous entrepreneurs have developed innovative, viable and feasible business ideas and products, however often these entrepreneurs lack the resources, skills and support to follow through on the implementation of their ideas and manage a growing and fragile business.

According to a study by The Small Enterprise Development Agency (SEDA), South Africa has one of the highest failure rates of new SMEs in the world, at an estimated 75%. According to the dti (The Department of Trade and Industry), five out of seven new small businesses started in South Africa fail within the first

year. That is an alarming failure rate of 71%. Further to this startling statistic, only 50% of all start-ups survive beyond 5 years. Reports have showed that growth of local small businesses stagnated between 2003 and 2012, despite the economic 'boom' experienced in the country between 2004 and 2006.

The high failure rate of small businesses in South Africa suggests that there is something fundamentally wrong with the existing status quo. Various institutions have noted the anomaly and notable concerns have emerged highlighting that the key to SME success and development lies in the entrepreneur's willingness to undertake hard work, commitment, dedication, and continuous learning; all of which improves the chances of ensuring a sustainable business enterprise.

It has been acknowledged that the existing support structures and annual-target oriented SME development strategies have failed to yield positive results, with resources for SME support and development being stretched intensely wherein the support structures become flaccid and weak, failing to achieve the desired results. Furthermore, this could be largely attributed to lack of continuous coaching, mentorship and provision of ongoing technical support to guarantee (or at least improve) long term sustainability and profitability of SMEs.

2. BACKGROUND

After the conclusion of consultation amongst the different spheres of government, it was noted that there is a need to revitalize and accelerate the industrial and commercial business opportunities in Western Corridor of Gauteng, aligned to the strategic perspective. In continuing with the provincial strategic perspective of township economy revitalization and youth employment agenda, the development of an SME development-focused industrial park model has been considered as a suitable vehicle to accelerate economic growth in the region.

Various consultations and research investigations are required in the development of the industrial park concept and operational model. It is envisaged that the industrial park shall assume the form of a supplier park with a particular product or sector focus in manufacturing, skills development and SME development. The industrial park should ideally be planned and conceptualized to be flexible for adaption to various sector specific activities.

In recognition of the concept to be developed, the Gauteng Growth and Development Agency, on behalf of the Gauteng Department of Economic Development and the Rand West City Local Municipality requires a feasibility study to be undertaken to develop the concept for a light industrial park, determine the market potential, develop a needs analysis based on potential opportunities, develop concept designs and determine the best site of the currently available sites for the Toekomsrus Industrial Park, provide an

indication of the potential impact that the implementation of Toekomsrus Industrial Park will have in terms of facilitation of access to sustainable economic development, leading to employment, poverty alleviation and industrialization in the region.

The Industrial Park is envisaged to promote and foster industrial development of SMEs in Gauteng. The Industrial Park must prioritize manufacturing to increase product variety and increase access for South African products and services both for local and international markets. Furthermore the Industrial Park shall be required to create fair, competitive and efficient trade for SMMEs.

Objectives of Industrial Park Development Programme:

- To accelerate SME growth and address unemployment
- To promote entrepreneurship and innovation
- To foster skills development and transfer
- To provide the principles of a business development and management
- To provide SME incubation and develop an action plan for achieving excellence in all areas for participating SMEs
- To demonstrate expertise and commitment to the delivery of self-sufficient and growing SMEs
- To prove Industrial Park to be added value of real economic impact
- To Integrate into the fabric of the community through Local economic development (LED) and its broader economic development goals and strategies
- Ensure effective public and private sector support for SME growth and development

It is therefore envisaged that the Toekomsrus Industrial Park shall operate like an incubation hub and manufacturing plant for products and services. The facility should ideally offer SMEs with spaces to manufacture products, store raw materials and finished products, distribution facilities and provide office space for business management. This approach, it is intended shall allow for shared facilities which should allow SMEs to benefit from economies of collaboration, scale and localization.

**B2: THE NATIONAL INDUSTRIAL PARTICIPATION PROGRAMME
(CHOOSE ONLY IF APPLICABLE)**

This document must be signed and submitted together with your bid

INTRODUCTION

The National Industrial Participation (NIP) Programme, which is applicable to all government procurement contracts that have an imported content, became effective on the 1 September 1996. The NIP policy and guidelines were fully endorsed by Cabinet on 30 April 1997. In terms of the Cabinet decision, all state and parastatal purchases / lease contracts (for goods, works and services) entered into after this date, are subject to the NIP requirements. NIP is obligatory and therefore must be complied with. The Industrial Participation Secretariat (IPS) of the Department of Trade and Industry (DTI) is charged with the responsibility of administering the programme.

1 PILLARS OF THE PROGRAMME

1.1 The NIP obligation is benchmarked on the imported content of the contract. Any contract having an imported content equal to or exceeding US\$ 10 million or other currency equivalent to US\$ 10 million will have a NIP obligation. This threshold of US\$ 10 million can be reached as follows:

- a) Any single contract with imported content exceeding US\$10 million. Or
- b) Multiple contracts for the same goods, works or services each with imported content exceeding US\$3 million awarded to one seller over a 2 year period which in total exceeds US\$10 million. Or
- c) A contract with a renewable option clause, where should the option be exercised the total value of the imported content will exceed US\$10 million.or
- d) Multiple suppliers of the same goods, works or services under the same contract, where the value of the imported content of each allocation is equal to or exceeds US\$ 3 million worth of goods, works or services to the same government institution, which in total over a two (2) year period exceeds US\$10 million.

1.2 The NIP obligation applicable to suppliers in respect of sub-paragraphs 1.1 (a) to 1.1 (c) above will amount to 30 % of the imported content whilst suppliers in respect of paragraph 1.1 (d) shall incur 30% of the total NIP obligation on a pro-rata basis.

1.3 To satisfy the NIP obligation, the DTI would negotiate and conclude agreements such as investments, joint ventures, sub-contracting, licensee production, export promotion, sourcing arrangements and research and development (R&D) with partners or suppliers.

1.4 A period of seven years has been identified as the time frame within which to discharge the obligation.

2 REQUIREMENTS OF THE DEPARTMENT OF TRADE AND INDUSTRY

2.1 In order to ensure effective implementation of the programme, successful bidders (contractors) are required to, immediately after the award of a contract that is in excess of R10 million (ten million Rands), submit details of such a contract to the DTI for reporting purposes.

2.2 The purpose for reporting details of contracts in excess of the amount of R10 million (ten million Rands) is to cater for multiple contracts for the same goods, works or services; renewable contracts and multiple suppliers for the same goods, works or services under the same contract as provided for in paragraphs 1.1.(b) to 1.1. (d) above.

3 BID SUBMISSION AND CONTRACT REPORTING REQUIREMENTS OF BIDDERS AND SUCCESSFUL BIDDERS (CONTRACTORS)

3.1 Bidders are required to sign and submit this Standard Bidding Document (SBD 5) together with the bid on the closing date and time.

3.2 In order to accommodate multiple contracts for the same goods, works or services; renewable contracts and multiple suppliers for the same goods, works or services under the same contract as indicated in sub-paragraphs 1.1 (b) to 1.1 (d) above and to enable the DTI in determining the NIP obligation, successful bidders (contractors) are required, immediately after being officially notified about any successful bid with a value in excess of R10 million (ten million Rands), to contact and furnish the DTI with the following information:

- Bid / contract number.
- Description of the goods, works or services.
- Date on which the contract was accepted.
- Name, address and contact details of the government institution.
- Value of the contract.
- Imported content of the contract, if possible.

3.3 The information required in paragraph 3.2 above must be sent to the Department of Trade and Industry, Private Bag X 84, Pretoria, 0001 for the attention of Mr Elias Malapane within five (5) working days after award of the contract. Mr Malapane may be contacted on telephone (012) 394 1401, facsimile (012) 394 2401 or e-mail at Elias@thedti.gov.za for further details about the programme.

4 PROCESS TO SATISFY THE NIP OBLIGATION

4.1 Once the successful bidder (contractor) has made contact with and furnished the DTI with the information required, the following steps will be followed:

- (a) the contractor and the DTI will determine the NIP obligation;
- (b) the contractor and the DTI will sign the NIP obligation agreement;
- (c) the contractor will submit a performance guarantee to the DTI;
- (d) the contractor will submit a business concept for consideration and approval by the DTI;
- (e) upon approval of the business concept by the DTI, the contractor will submit detailed business plans outlining the business concepts;
- (f) the contractor will implement the business plans; and
- (g) the contractor will submit bi-annual progress reports on approved plans to the DTI.

4.2 The NIP obligation agreement is between the DTI and the successful bidder (contractor) and, therefore, does not involve the purchasing institution.
